Problem Statement 5

Daily Summary in Google Sheet

The attendance in the office is Pure Physical Presence based. So we want to make sure that whenever anyone says, Present name. The sheet separate the name and makes list out of it.

Soln: The online Platform we use is 'IFTTT'

If This

In this step we need to set choice Alexa / Google assistance and choice phrase with text and put are in input may present & and create then in second step.

Then that

choice in the Google sheet or
Excel sheet and the
click on "Create spreadsheet"
button. However, you will be
able to see the Google Assistant
data will be listed in your
Google sheet.
