

## Internet of Things

Problem Statement: 3

Daily Scrums, automate Automation

Every Monday: Pradeep (CEO of the

company) wants to automate the process

of making the do list, so he wants

to make sure that he can say

it to Alexa and it adds it to

execute and make a common

list for everyone.

So, As follows same as previous

statement

The online platform we use

is IFTTT.

Two start first we need to

create an applet we have

two steps

1. If this

2. Then that

In first step In If this we need to select Google assistance or Amazon / Alexa and Now i am selecting Google assistance there we have some options like "single phrase" "phrase with number" etc.

In than that we need to select evernote and trigger it so by that we can be get what ever the commands you give to alexa / Google assistance will be listed in your evernote

and i just creat and finish it you will get notified.
